

# Discovery Worksheets

## Sea life

Different sea creatures live at different depths of the ocean. The amount of sunlight and the availability of food change greatly as you descend to the depths of the ocean.

Ocean food web. This diagram is not to scale.

1. Use the diagram above and research in your library or on the Internet to complete the table below.

Species	Size	Colour	Zone/approx. depth	Predator (who will eat it)
Seal	1-6.5 m	Grey/brown	Sunlight/surface to 200 metres	Killer whale
Crab				
Sperm whale				
Stingray				
Seabird				
Angler fish
