

Discovery Worksheets

Human origins

Chronological order

Using the map of early human migration on pages 18–19 of the *Atlas of Discovery*, place each of the following information statements in its correct sequence on the timeline below. You may also need to use the world map on the endpapers of the atlas to locate the countries. The first statement is listed on the timeline as an example. (Note: BP means ‘before present’.)

- Early humans in France
- Humans migrated to southern South America
- Humans migrated to Hawaii
- Humans migrated to Australia
- Early humans in China
- Early humans in Africa
- Humans migrated to North America
- Humans migrated to French Polynesia
- Early humans in the Middle East
- Humans migrated to New Zealand
- Early humans in Russia
- Humans possibly crossed the Siberian–Alaskan land bridge
